## NOTES

**Rounding of Figures.** Many of the figures appearing in the tables have been rounded (to thousands or, in some cases, millions), without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

**Population and Vital Statistics.** Estimates of the population of Australia (and of States and Territories) are prepared quarterly by the Commonwealth Statistician, Canberra. The estimated population in each State or Territory represents the population ascertained at the 1966 Census plus recorded natural increase and recorded net gain from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of State of residence under child endowment procedures or Commonwealth electoral procedures supplemented by results of any special count or sample survey. Holiday, business or other similar short-term movements between States and Territories are omitted. As records of migration by State or Territory are not complete, the estimated State and Territory populations so derived are approximate and are subject to revision when the actual population of each State is ascertained at the 1971 Census. Rates of birth, death, marriage and natural increase which are based on these populations are similarly subject to revision.

Before an amendment to the Australian Constitution in 1967, it was provided by section 127 that 'in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted'. This provision was deleted following a referendum held on 27 May 1967 which resulted in a large majority of votes in favour of its repeal. The enabling Act, the *Constitution Alteration (Aboriginals)* 1967, came into operation on 10 August 1967.

The population estimates appearing in Table 1 refer to total population, i.e. including Aborigines. Vital statistics, which until 31 December 1966 excluded births, deaths and marriages of full-blood Aborigines, now include events among the total population. The term 'full-blood Aborigines', as used in relation to these statistics, is to be understood to mean persons with more than one-half Aboriginal blood.

**External Trade.** From 1 July 1965, when a new Australian Customs Tariff was introduced, imports have been classified according to an Australian Import Commodity Classification based on the *United Nations Standard International Trade Classification, Revised*. From 1 July 1966, an Australian Export Commodity Classification, also based on the Standard International Trade Classification, was adopted in the tabulation of export information.

The Standard International Trade Classification follows closely the 'Brussels' tariff nomenclature used in the new Australian Customs Tariff. The Standard International Trade Classification consists of 10 broad commodity categories designated 'Sections' and comprising 56 commodity 'Divisions' which are further divided into 177 commodity 'Groups'. The structure of the classification serves to provide a summary of data relating to 1,312 basic items of international trade. The Sections, Divisions and Groups, and the relevant reference numbers, are shown in Table 23. The first digit of the reference number denotes the Section; the first two digits, the Division; and three digits, the Group. In some cases, the descriptions of commodity Divisions and Groups are abbreviations of the full text, which is available in the Australian Import Commodity Classification and the Australian Export Commodity Classification issued by the Commonwealth Bureau of Census and Statistics, Canberra.

**Employment Estimates.** The employment estimates shown on page 36 in this publication are not directly comparable with statistics derived from the 1966 Population Census, for which new work force definitions were adopted. A new series of estimates for June 1966 and subsequent months will be published as soon as possible. This new series will be based on 1966 Census benchmarks and will therefore be at a higher level than the present series. In due course the estimates for periods prior to the Census of June 1966 will be revised, but on a basis comparable with that of the 1961 Census benchmarks, the information needed to revise these benchmarks on the 1966 Census basis not being available.

**Finance Companies.** The summary of the principal statistics of the lending operations of corporate Finance Companies, shown in Tables 56-9, covers the operations of companies engaged mainly in providing certain credit facilities to the general public (companies and persons). Banks, insurance companies, etc. and companies providing credit to 'related companies' are excluded.

The outstanding balance for a particular period cannot be verified by the addition of the amount financed to the previous month's outstanding balance, less collections and other liquidations for the period under review, owing to the amount financed being a 'net figure', i.e. it excludes interest, insurance and hiring charges.

Additional information on this subject is available in the mimeographed publications *Finance Companies* issued monthly and annually by the Commonwealth Statistician, Canberra.

The abbreviation 'n.e.i.', where it occurs in the tables, denotes 'not elsewhere included'.

## I—POPULATION AND VITAL STATISTICS

NOTE. Estimates of population and rates of birth, death, marriage and natural increase for dates and periods subsequent to the Census of 30 June 1966 are subject to revision after the 1971 Census.

A line drawn across a column between the figures, as in Tables 2 and 3, indicates a break in continuity in the series; see note *Population and Vital Statistics* on page 2.

(a) Most cargoes are recorded in terms of the ton weight of 2,240 lb but some cargo, consisting mainly of bulky commodities, is recorded on the basis of the ton measurement, a unit equivalent to 40 cubic feet of space. Statistics are compiled accordingly in terms of 'tons weight' or 'tons measurement'. In order to provide a ready comparison, as in this table, of the volume of cargo handled at the several ports or in different periods, the amounts recorded in the two categories have been aggregated. In Table 21 details of cargo handled at each port are presented separately on the basis of 'tons weight' and 'tons measurement'. (b) Buoyed sea terminal. (c) Less than 500 tons. \* Revised.

## VI—PRODUCTION

## No. 30—Estimated Net Value of Production

*Net Value of Production* is the sum available for payment of wages, interest, rent, depreciation, other overhead costs, and for the producer's own income and profit. For Primary Production it is obtained by deducting from the value realised at the principal market all marketing costs and the cost of goods used in production (seed, fertiliser, pickling, sprays, dips, fodder, fuel and oil, etc.). For Manufacturing, it is obtained by deducting from the selling value at the factory door the cost of goods consumed in the process of production (i.e. materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packing).

(a) Not available for publication. (b) Details for these years not published by the Department of Mines; particulars of Alumina are shown above. (c) Comprises gold refined at the Mint and gold contained in gold-bearing materials exported. (d) Includes payments by Gold Producers' Association Ltd. but excludes Commonwealth net subsidy paid to gold producers. (e) Comprises pig-iron produced from ore smelted at Wundowie. (f) Comprises ore for smelting at Kwinana and for export interstate. (g) Comprises overseas and interstate exports excluding exports from Kwinana; see also footnote (f). (h) Quantity of crude oil sold. The value is based on the price of \$US3.58 a barrel at Kwinana, as assessed by the Tariff Board for Barrow Island crude oil. (i) Includes building stone, clays and limestone as reported to the Department of Mines. As some production on privately-owned land is not reported, Department of Mines records for these commodities are incomplete. (j) Excludes the value of bauxite and nickel. (k) Less than \$500.

(a) Rates for Perth. (b) Rates operative from beginning of first pay-period commencing in the month shown or commencing on or after the date shown. (c) The rates shown are those which applied until a decision of The Western Australian Industrial Commission dated 27 June 1967. The terms of this decision were that the minimum weekly wage payable to adult male workers under certain awards be increased from \$36.55 to \$37.55; 'that the wage rates for adult workers not in receipt of the "minimum wage" be increased by 60 cents per week; and that other wage rates be adjusted as if the basic wage for males and the basic wage for females had been increased by that amount'. These increases were declared to operate from the beginning of the first pay-period commencing on or after 1 July 1967. A further increase of \$1.35 a week for adult males and adult females was granted by the Industrial Commission in October 1968 to operate from the beginning of the first pay-period commencing on or after 25 October 1968. (d) The rates shown applied until a decision of the Commonwealth Conciliation and Arbitration Commission in June 1967 to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967. Total wages for adult males and adult females were to be increased by \$1 a week from the same date. In October 1968 a further increase of \$1.35 a week for adult males and adult females was granted by the Commission to operate from the beginning of the first pay-period commencing on or after 25 October 1968. (e) Rates prescribed under the provisions of the *Industrial Arbitration Act Amendment Act, 1968*.

## No. 44—Weighted Average Minimum Weekly Wage Rates

NOTE. The minimum wage rates and index numbers in the following table embrace a representative range of occupations and are based on the occupation and industry structures in 1954. The wage rates shown in the table and used in the compilation of the indexes are the lowest rates payable for a full week's work (excluding overtime), as prescribed in representative industrial awards, determinations, and agreements. The rural industries are excluded from the table.

The wage rates shown should not be regarded as actual current averages, but as indexes expressed in money terms, indicative of trends.

A more detailed description of the Minimum Wage Rate Index and tables giving figures for additional dates are published in the mimeographed statement *Minimum Wage Rates, March 1939 to June 1965* issued by the Commonwealth Statistician, Canberra.

(a) Based on employment and salaries and wages recorded on Pay-roll Tax returns and from other direct collections and estimates. Particulars of wages and salaries paid are not available for males and females separately from the sources mentioned and average weekly earnings have therefore been calculated in terms of 'male units'. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings in Australia. 'Earnings' include salaries, wages at award rates, overtime earnings and over-award and bonus payments.

NOTE. Quarterly figures are affected by seasonal influences. Comparisons as to trend are therefore best made by relating complete years or corresponding quarters.

## XIV—BUILDING

NOTE. Building statistics are compiled from :

- (a) building permits issued by local government authorities in Western Australia to private persons and firms for operations in areas subject to building control, i.e. 'private' ownership building, and  
 (b) information from a number of sources on contracts let, work commenced or work authorised by government, semi-government and local government authorities, i.e. 'government' ownership building.

Building is classified as 'Private' or 'Government' according to ownership at date of commencement. Thus 'Government' includes buildings erected for Commonwealth and State Governments, semi-government and local government authorities either by contractors or by day labour, whether these buildings are for their own use, for rental, or for sale after completion. Buildings erected for private ownership, or which are financed or supervised by government authorities but erected for particular persons, are classified as 'Private'.

Prior to 1 July 1966, additions valued at \$10,000 or more to buildings other than houses were classified as 'new' buildings. From 1 July 1966, alterations and/or additions valued at \$10,000 or more to existing buildings of all types are included as 'new' buildings.

The value of land on which the projected buildings are to be erected is not included in the values shown.

## XVII—MOTOR VEHICLE REGISTRATIONS

In Western Australia there is no single authority responsible for the licensing of vehicles. The Traffic Branch of the Police Department licenses vehicles in the Metropolitan Traffic Area as defined in Regulations made under the *Traffic Act, 1919-1968*. Outside the Metropolitan Traffic Area each local government authority is responsible for the licensing of vehicles in its own district. (From 1 January 1969 the licensing of vehicles in the Shires of Broome and West Kimberley became the responsibility of the Police Department under the provisions of the *Traffic Act Amendment Act, 1967*.)
